Concept:

- Watch Investment Fund focuses on luxury watches as an investment opportunity
- Investors pool their capital into the fund
- The fund uses the capital to acquire high-end timepieces
- The goal is to generate returns through strategic trading of these watches
- Investors have the opportunity to own valuable watches exceeding their investment value
- Ownership and potential appreciation of the watches during the investment term
- At the end of the term, options include selling the watches for profit
- Investors may also choose to pay a close-out fee to retain ownership
- Reinvestment options available

The Watch Investment Fund provides investors with a unique investment opportunity in the luxury watch market, offering the potential for attractive returns based on the desirability and value appreciation of these prestigious timepieces.

ALTFEX

ALTERNATIVE FUNDS EXCHANGE

The Watch Investment Fund takes a two-pronged approach to its acquisitions in the intricate watch industry:

1. **Acquiring timepieces that are unattainable through monetary means:** The fund's extensive connections at the highest levels enable them to order exclusive pieces and limited productions that are inaccessible to others. In many cases, it's not merely a matter of having the financial resources but also gaining privileged access.
2. **Securing timepieces at prices lower than what others can obtain:** The fund specializes in acquiring watches below the cost at which they are sold by retailers. This allows them to obtain exceptional timepieces at advantageous prices that are not available to other market participants.

Case Studies:

207.16%

profit within 8 years
equivalent to 25.89% p.a.

- WF purchase price 14,000 SGD on 27th March 2013
